2. Citations and explanations (Rule 70 7)

Claims 1-25:

Claims 1 to 25 meet the requirements of PCT Articles 33(2) – (4). None of the prior art documents, or obvious combination thereof, disclose a syringe with resilient means to retract a needle wherein the resilient means has a restrained condition that limits forward movement of the needle. Nor does the prior art disclose or suggest a syringe that retracts the needle into a plunger wherein means blocking an opening at the front of the plunger are first broken, and thereafter continued movement of the plunger causes the needle to be retracted back into the plunger. Claims 1 to 25 are therefore novel and inventive. The claims also have industrial applicability.
